

15. Banner Ironwood Medical Center

Location: Queen Creek

Construction Cost: \$82 million

Started: April 2008

Target Completion: September 2009

Owner: Banner Health

Design Firm: SmithGroup

General Contractor: McCarthy

Building Cos.

Engineers/Design Consultants:

Paragon Structural Design; Dibble Engineering; JJR|Floor

Subcontractors: W.D. Manor

Mechanical; Wilson Electric; Schuff Steel; Walters & Wolf; Rhino Masonry; Kovach; Pete King

This 233,000-sq-ft project includes a five-story patient tower plus a diagnostic and treatment building for imaging and surgery. It includes an 18-bay emergency department with a basement and modular central plant.

The 24-bed start-up facility has the ability to grow to 82 beds without any building expansion. Eventually, the facility can

grow to 500+ beds with the incremental addition of patient towers and expansion of the diagnostic and treatment areas. >>
